EMBLEM

Ideally situated with their unending expanse of flat terrain and rolling hills, the southlands of America from the Atlantic to the Pacific offer the utmost of desirable training areas. The 381 School Squadron at Craig Field, Alabama, finds its site admirable for assimilation of students in the specialized manipulation of pursuit planes. In reality this School Squadron which is a part of the Southeast Air Corps Training Center, operates as an Advanced Flying School and is turning out its quota of experienced pilots at a speed to keep pace with the outpouring assembly lines. The Walt Disney artists took special pleasure in honoring the request for insignia by the 381st School Squadron. Donald Duck was seated in a small, stationary clipped wing training plane where he could not be restrained from enthusiastically holding the stick.
