

954 RESERVE SUPPORT SQUADRON

MISSION

The 954 RSPTF operates at major air command level and as such is authorized normal communication channels with units, numbered air forces, other major air commands, air staff, and other departments/agencies. As the Air Force Element (AFELM) of the Joint Transportation Reserve Unit, supports the United States Transportation Command in providing global air, land, and sea transportation to meet national security objectives in peace and war by maintaining command and control of lift forces and logistical infrastructure, setting operational lift policy, providing crisis planning for force deployment and sustainment, and improving the common-user lift system.
