OPERATIONS

Trained in the Reserve, 1949-1951, performed limited troop carrier operations from mid-1950 until ordered to active service and inactivated in 1951.

While wing stationed at Altus AFB, Okla, tactical components underwent C-124 training, Jun-Oct 1953.

Performed global airlift missions, including occasional humanitarian or mercy missions, using C-124s as primary carriers Oct 1953-Mar 1967, but also using C-119s, 1953-1954, and helicopters, 1954-1957.

Switched to C-141s as primary aircraft in Apr 1967, upon moving to Norton AFB, Calif.

Among the wing's notable operations were airlifts and airdrops in the North American arctic during construction and subsequent operation of the distant early warning (DEW) line, 1954-1956, and on floating ice islands in support of scientific stations in the Arctic Ocean, 1957-1966; airlift and airdrop support in the Antarctic in support of the Navy's Operation Deep Freeze, 1956-1966; maintenance of a complete tactical squadron on rotation in Europe, Aug 1956-Jan 1967; airlift missions to the Far East and Southeast Asia during the Southeast Asia conflict, 1967-1973; evacuation of former American prisoners of war from North Vietnam (Operation Homecoming) in early 1973; and support of airlift of Vietnam refugees from their homeland to the United States (Operation New Life) in 1975.

From 1976 until wing inactivated in 1994, commanded airlift and supporting units to airlift troops, cargo, equipment, passengers, mail and aeromedical evacuation/airlift to and from

areas around the world.
