

## 84<sup>th</sup> COMBAT SUSTAINMENT WING

### **MISSION**

The 84th Combat Sustainment Wing provides the full scope of program management of weapon systems, resource management and planning. It provides system support manager functions for air-to-surface munitions, and multiple Command, Control, Communication and Intelligence systems, and supply chain management for space systems, C3I systems, landing gear, power systems and multiple aircraft programs.

The 84th Combat Sustainment Wing is responsible for delivering a full spectrum of combat capabilities through program management of weapon systems & commodities, resource planning & execution, and associated financial, engineering, and contracting activities.

Our dynamic \$6.8B enterprise is responsible for managing, directing, and execution of Supply Chain Management policy and operations for the Ogden Air Logistics Center.

We are responsible for worldwide logistics & engineering support of diverse business areas including all F-16s, A-10s; mature & proven aircraft; major Space and Command, Control, Communications & Intelligence (C3I) systems; a \$22B stockpile of munitions; landing gear, secondary power systems; and highly sensitive classified & specialized programs.

Our Combat Sustainment Wing is made up of 1,540 civilian personnel and 293 military members. Our customers include Department of Defense Services, combatant commands, and over 75 foreign governments.

## **Decorations**

## **EMBLEM**

Azure a globe Celeste, land masses of the first, surmounted by a four-pointed star Or in fess point; in base, a winged bombsite of the third, voided of the field, wings Argent, all within a diminished bordure of the third. Attached below the shield, a White scroll edged with a narrow Yellow border and inscribed "84TH COMBAT SUSTAINMENT WING" in Blue letters. **SIGNIFICANCE:** Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The globe represents the worldwide support for USAF, including Area of Responsibility as well as Foreign Military Sales and other agency customers. The points of the star each have a special symbolism: the north point represents space systems supported by the unit; the south point represents the ground based systems; the east point represents the single manager programs; and the west point represents the munitions systems and components supported by the unit. The wings represent the many airborne systems the unit supplies, the aircraft supply chain management organization and the 84th Commodities Sustainment Group. The bombsite between the wings symbolizes the lineage and heritage of the unit.

## **OPERATION**

The 508th Aerospace Sustainment Wing and the 84th Combat Sustainment Wing at Hill AFB, Utah, will be merged into one unit in the coming months. Ogden's Standard-Examiner reported yesterday that the 84th CSW will join the 508th ASW, thereby consolidating leadership and management functions since these two organizations have like responsibilities. According to the newspaper, the reformed 508th ASW will oversee sustainment activities for weapon systems like the A-10, F-16, F-22, F-35, and some simulators and training equipment as well as MQ-1 Predator and MQ-9 Reaper unmanned aerial vehicles. It was just last month that Hill was identified as the seat of future MQ-1 and MQ-9 depot work. The UAV-related work could bring about 300 new jobs to Hill, the

newspaper said.
